

RACKET™ studios

Karaoke Video + Video Message + Photo Booth

Racket is a soundproof music video recording studio and photo booth all in one! Guests can text their video, photo, or greeting to anyone and share their memories from any important event.

Karaoke Video Studio

Guests choose a song and record their own music video! Racket's music library has thousands of song selections from pop hits to the classics. Complete with studio headphones, microphones, and an audio enhancer, everyone sounds like a star.

Video Message

Guests can record a special video message up to 60 seconds that the host will receive automatically after the event. Guests can also text a copy of these messages to themselves and anyone else.

Photo Booth

This feature allows guests to take personalized photos with the addition of editing features such as filters, stickers, touch screen drawings, and more. A "re-shoot" option is also available for any desired do-overs. Each Racket kiosk also comes fully stocked with music themed props to add to any video or photo session!
