

RACKET[®] studios

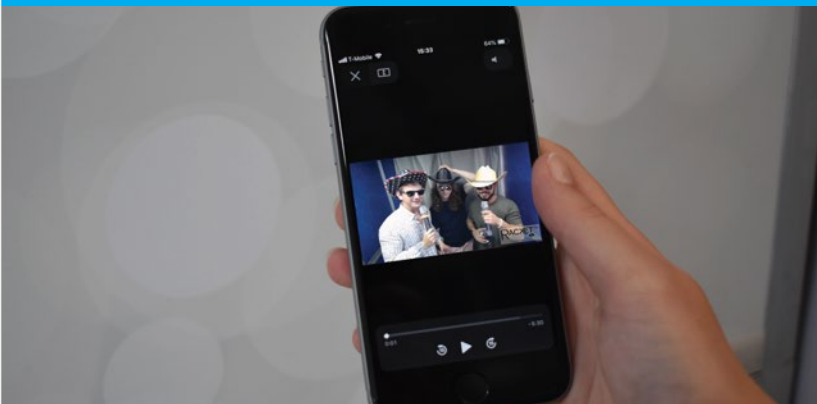

Karaoke Video + Video Message + Photo Booth

Racket is a music video recording studio and photo booth all in one! Guests can text their video, photo, or greeting to anyone and share their memories from any important event.

Karaoke Video Recording

Choose from thousands of karaoke songs. We have licensed with major music publishers to give you a comprehensive music library that is updated with your favorite songs regularly. Each Racket studio has 4 sets of professional headphones and microphones so you can share the fun with your friends. And with its studio quality acoustics and audio enhancer, everyone sounds like a star. All the karaoke videos that you create are sent straight to your phone via text and customized link.

Video Message

Guests can record a special video message up to 60 seconds that the host will receive automatically after the event. Guests can also text a copy of these messages to themselves and anyone else.

Photo Booth

This feature allows guests to take personalized photos. A "re-shoot" option is also available for any desired do-overs. Each Racket studio also comes fully stocked with music themed props to add to any video or photo session! Printer Included!
